DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated Morgan et al. USPN 5,222,492 Kronberg USPN 6,535,767 or Gnerlich et al USPN 4,571,556. Morgan et al uses a similar arrangement as applicant including a controller for generating a sequence and for pausing current flow. A pulse width modulator controls a desired waveform in the patient as seen in figure 6. Kronber uses a similar system (FIG 4) as well as Gnerlich (figure2)

Claim Rejections - 35 USC § 103

Claims 2, 5, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morgan et al. USPN 5,222,492 Kronberg USPN 6,535,767 or Gnerlich et al USPN 4,571,556. To have varied the amplitude and density to achieve various wave forms would have been obvious. In addition, applicant does not require the output to have a periodic wave burst so that one may arbitrarily lump blocks of pulses together to meet the claim language.

Allowable Subject Matter

Claims 11-20 are allowed.
